

Keyframe UK Ltd

Declaration of non toxicity for compliance to BS EN 14351

Keyframe UK declares that windows and doors made from our REHAU PVC 1406/1476 and Spectus Elite 70 window systems are not liable to emission or migration of dangerous substances during normal intended use.

All glazing units supplied by Keyframe UK for use in windows and doors are regarded as non toxic. All components used in the manufacturing process are chemically inert when present in the finished insulating glazing units. Insulating Glass Units provided by Keyframe UK are not considered harmful to health or to the environment and are free from emissions when in normal use.

Window hardware supplied on manufactured frames has been assessed by our suppliers and we can ensure that the products that are being supplied are articles following the definition of new EU Chemicals Regulation REACH (Registration, Evaluation and Authorisation of Chemicals)
